

BIN There, **DO** That!

Keep Mobile Beautiful Invites You to Learn about Green Recycling

Green recycling takes material most of us throw away like grass clippings, leaves and plant-based food scraps, and turns it into compost to fertilize community gardens. Adding compost to soil enhances the appearance and productivity of the gardens which provide fresh produce to gardeners, food pantries and low income residents.

Thanks to a grant from Keep America Beautiful and Lowe's, Keep Mobile Beautiful has built compost bins for 13 Community Gardens in the Mobile area. Mobile Urban Growers identified the gardens and assisted with gardener training. To learn more, visit a bin at one of the free community events below, or check out our website, keepmobilebeautiful.org.

Community Demonstration Sites

- Oct. 12** LODA Art Walk, The Lost Garden, 265 Dauphin St.
- Oct. 16** Eichold-Mertz School, Workshop 3:30-4:30, 2815 Government Blvd. *
- Nov. 3** Fall Open House, MCPSS Environmental Studies Center, 6101 Girby Rd. *

*Register to win your own bin.
